

PNG Installation Guide

Euro Truck Simulator 2 / American Truck Simulator

Before You Begin

PNG is a massive project that affects many aspects of the game. For the first installation, it is recommended to clear the mod folder (remove other mods, older PNG files, fixes, etc.) to ensure everything works smoothly.

Add additional modifications step by step.

1. Installation

Extract the downloaded file using WINRAR or 7zip.

Open the extracted folder.

Move all files from 'Main Mod files' into:

Documents/Euro Truck Simulator 2/mod

Mod Activation

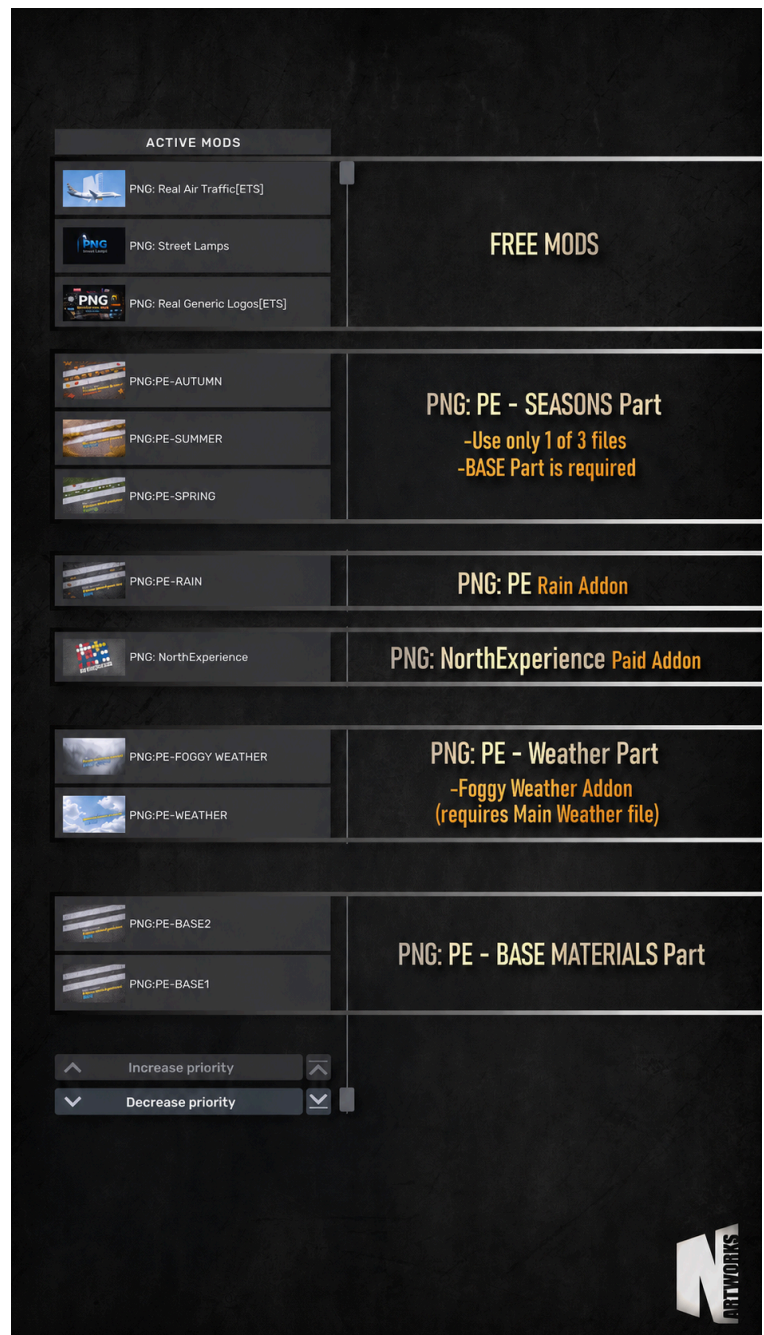

Open Mod Manager in game and place PNG files in the correct load order. The layout below keeps the description on the left and the load-order image larger on the right.

Load Order Notes

Use the load order shown on the right.

Recommended rule:

- Keep FREE MODS at the top of the PNG section.
- For PE - SEASONS, use only 1 of 3 files.
- BASE Part is required.
- NorthExperience is a paid addon.
- PE Rain Addon and PE Weather parts go above the base materials.

Compatibility

- PNG is compatible with ProMods and other map mods.
- It is not recommended to use PNG together with other graphic mods.
